

g-smart

You can have all control from your mobile phone with absolute reliability.

G-Smart communicates with you through **short messages SMS**, accepting orders, confirming its reception and, warning wherever you were, any eventuality.

These are some advantages and applications of G-Smart:

As alarm transmitter, it has 4 alarm inputs that can be programmed as alarm system for warning of any event through SMS .

Can be programmed **4 different alarm events** , and for each one could be sent SMS messages to **4 different phone numbers** anywhere worldwide.

Uses:

**alarm for cars ,
trucks and transport companies
alarms for caravanning (in camping , garages , ...)
isolated country houses
yachts , boats ...etc.**

Could be connected to this alarm inputs any sensor or control system.

Any sensor could be connected to **G-Smart**, and in case of reaching a certain level or happen some incidence, **G-Smart can be programmed for sending an informative SMS**. At the same time, through relays could be driven devices to correct the failure.

Uses:

**vending machines (failures, lack of any product, ...)
industrial freezers (control of temperature within the established margins)
any kind of electrical device or machine.**

G-Smart can function for remote connection / disconnection. Relays (2 to 8) can be connected to any remote electrical device.

Do not hesitate to contact us for any question or doubt over characteristics of new **G-SMART**, functioning, installation, technology.....**we will be pleased in attend you .**

You can contact us in the following email: info@intelligent-systems.de or in the telephone **+49 2832 50 53 090**

This means that you, **using short messages SMS**, can drive electrical devices **remotely**, and **receive an SMS answer confirming** fulfilment of its orders

Uses:

**irrigation or central heating in green house, enterprises illumination in country houses
any electrical household (washing machine , automatic irrigation, lights, central heating, . . .)
connection / disconnection of sirens , horns...**
